Unsung Heroes

Not to be trite, but the expression “it takes a village” is accurate in so many facets of our lives and ICL is no different. ICL has a strong and effective Board and, in addition, many individuals behind the scenes. Here are just a few of the volunteers that keep the organization running smoothly.

Who makes your name tags?
Who creates your parking decal?
Who coordinates all the classroom coordinators?
Who proofs the very bulletin you are reading?

Each and every one of those volunteers are an integral part of ICL and are ICL’s unsung Heroes.

The Board and I would like to thank the following individuals for their continued support of ICL: Suzanne Carter, Don Berry, David Fann, and SuSu Davis. Thank you for your dedication to ICL and for being active members of the ICL Village of Volunteers.

See You In Class,
Steve Demand
ICL 2019 Board President

P.S. – If you would like to volunteer please contact me or the ICL Office.

DEATH AND DYING: A FAMILY PERSPECTIVE

Scotty Hargrove, 6 Sessions, Monday, January 13 – February 17, 1:00 pm – 3:00 pm, Cost: \$20

The inevitability of death is a significant source of anxiety for individuals and families. Difficulties in talking about death and the discomfort that people experience often result in conflict and distance among families that makes managing illness and eventual death even more difficult, sometimes catastrophic. An understanding of how each family historically has dealt with death enlightens and provides the resources for clear communication among the family members and health care providers. This clarity enables dying persons and family members to make informed decisions about the final days of their loved ones. This series of meetings is designed to help clarify emotional issues of death and dying and to identify potential resources that may be helpful.

Scotty Hargrove, BD, Columbia Theological Seminary; PhD, University of Georgia; founding director Pine Belt Regional Mental Health and Retardation Center, Hattiesburg MS, faculty department of Psychology and director clinical psychology training program, University of Nebraska; chairman, Department of Psychology, University of Mississippi; interim chairperson Department of Modern Languages, University of Mississippi; interim chairperson, Department of Exercise Science, University of Mississippi. Faculty member, Georgetown Family Center, Washington DC.

UKULELE 101 – Class Limit 18

Cy Sineath, 6 Sessions, Monday, January 13 – February 17, 3:15 pm – 5:15 pm, Cost: \$20

Where else can you take a class and automatically be plugged into a local “club”? Those who have taken Ukulele 101 have formed a group that continues to play at a local restaurant on a weekly basis. (This is in addition to the class itself.) The ukulele is enjoying a great resurgence in popularity, the world over. This course is an opportunity to learn to play and enjoy the “funnest instrument on earth”. No prior musical experience is necessary, and please, no music theory. Each week, the class will learn new chords, songs, and strumming patterns that build on the week before. By the end of the 6 weeks, participants should be able to play literally hundreds of songs and confidently strum along with ukulele groups wherever they are found. Singing and laughing are integral to this course! Requirements: A ukulele and a willingness to sing and laugh with the group! The facilitator has a limited number of ukuleles that may be loaned until participants obtain their own.

Cy Sineath has been playing the ukulele for 5 years and has enjoyed playing socially with groups throughout the southeast as well as Dublin, Ireland and London, England. Prior to moving to Blairsville in 2017, he played regularly with two groups in the Atlanta area. He feels the ukulele is much like the game of Bridge; you can learn the basics in a matter of hours and then spend the rest of your life mastering it. He now lives here in the mountains with his wife, Labrador Retriever, and more than a few ukuleles.

GETTING TO KNOW YOUR CAMERA & BASIC PHOTOGRAPHY - Class Limit 12

Stephan Banakas, 6 Sessions, Tuesday, January 14 – February 18, 1:00 pm – 3:00 pm, Cost: \$20

This course is intended to be very basic and will begin by reintroducing the students to their cameras and taking them beyond simple “Point & Shoot”. We will begin by discussing features that most of today’s digital cameras have. This will include various settings and when to use them. **Students are encouraged to bring cameras and manuals.**

We will also cover where and how to save your photos in a way that you can recover them without much difficulty, and most importantly, how to do all of this without using up all of your computer’s memory. A number of other issues, light, shutter speed, aperture settings, and focus, and their interactions with each other will be explained.

Very basic rules of composition will be discussed. There will also be an explanation of “depth of field” and to make it work for you. Shooting long exposures, the use of a tripod and natural light will also be emphasized. There will also be opportunities to actually get out and take some pictures using some of the techniques we touched upon.

Stephan Banakas came to the mountains initially in the 1950's as a camper and became a resident after his retirement in 1999. He started in photography over 50 years ago, used it professionally in his work, and moved into the digital age over the last 10. Being a devoted fly fisherman and coming into contact with nature's beauty he stepped back into photography and began specializing in wildflower and landscape photography.

THE GREAT LAKES AND THEIR ISLANDS, WITH A FOCUS ON MIDDLE BASS ISLAND IN LAKE ERIE

Michael and Jean Gora, 3 Sessions, Thursday, February 6 – February 20, 10:00 am – 12:00 pm, Cost: \$16

Starting with an overview of the Great Lakes and their major populated islands, the course will then zoom down to Lake Erie and further to Middle Bass Island in Ohio, a quiet island community of about 500 homes. The course will cover the history of the islands, the major tourist attractions on several of them, and then focus on the issues of living on the larger and smaller islands. The issues are both similar to and different from those of small rural communities on the mainland. We will cover jobs, schools, medical services, infrastructure and more, and focus on some water quality issues such as algal blooms.

Michael Gora was a physicist and then a computer scientist and has taught ICL courses on cosmology, but his other passion in retirement has been writing books about the history of the Lake Erie Islands. He currently serves on the steering committee of the Great Lakes Islands Alliance, which works with 14 Great Lakes islands and also partners with the Island Institute in Maine serving 15 more islands. The Great Lakes hold one-fifth of the world's fresh water and have a fascinating history and current role in our country.

Jean C. Gora retired in 2008 from a 33-year career as a researcher for the banking and life insurance industries. She has a BA from Mount Holyoke College and an MA from Johns Hopkins University. She taught three previous ICL classes, one on the financial crisis, one on life under the Third Reich, and one on the Bosnian war. Jean's family arrived as summer residents on Middle Bass Island (Ohio) in Lake Erie 100 years ago. Jean has spent most of the past 70+ summers there, a significant part of that time actually in the lake. (No shower in the original family cottage.) She has also written a book about Lake Erie island history.

UNDERSTANDING HOMEBREWING

Tom Volk has been homebrewing ever since his son-in-law gave him a 2 gallon starter kit some 20 years ago. Although he brews mostly for his own amusement, friends and relatives always say yum. Participants should bring a mixing bowl, a baking sheet, a cooling rack and a slotted spoon.**

Norma Berkman retired to Young Harris in 2014 after a 30 year career as a CPA in Fort Lauderdale. She began making her own bagels when she couldn't find authentic ones in the area - "chewy on the outside and dense on the inside".

BEGINNING/CONTINUING AUTOHARP – **Class Limit 12**

Jennifer Cordier, 4 Sessions, Friday, January 31 – February 21, 1:00 pm – 3:00 pm, Cost \$18

The title of the folk song, "Simple Gifts" is a perfect description for the Autoharp. This lovely instrument offers beginning players immediate gratification as one simply depresses a chord bar and strums across the strings. Many tunes can be accompanied using only three chords; thus the gift of music can be easily shared with others. Come and learn to pick, pluck and strum the Autoharp as we sing and accompany ourselves to many familiar folk songs. Give yourself the "simple gift" of music!

Materials required: Autoharp (in playable condition), Three finger picks and one thumb pick, Chromatic tuner, Tuning wrench and Music stand. **Note: A notebook with all music and instructional materials will be provided by instructor. A \$10 materials fee will be collected the first day of class.** Contact instructor for autoharp rental information.

Jennifer Cordier has taught many classes at ICL including organic gardening, herb gardening, native medicinal herbs, Zentangle and music classes with members of her band.

Jennifer has been playing the Autoharp for 25 years. She has taught Autoharp at John C Campbell Folk School, Oasis in Blairsville, Georgia and gives private lessons. Jennifer plays Autoharp and performs with the folk band Butternut Creek and Friends.

Dr. Drew Van Horn, YHC President

Since ICL students are life-long learners, I'll use this edition of the ICL newsletter to bring you up to speed on YHC's newest academic offerings.

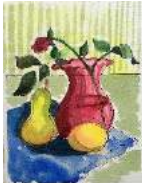

Last year, we began diversifying our programs in the Department of Business and Public Policy. We added Bachelor of Science degrees in Accounting, Economics and Management in 2018, and this year, we added degrees in Finance and Marketing. We also added a minor program that allows students—regardless of major—to take coursework that prepares them to sit for the exam required to become a certified financial planner. Last year also saw the addition of two new Bachelor of Arts degrees: one in Graphic Design and one in Theatrical Design & Production.

Additionally, YHC recently became the first institution to formalize a 3+2 agreement with the University of Georgia's College of Engineering. This will allow students to complete three years at YHC followed by two years at UGA to earn a dual degree in Mathematics (YHC) and Mechanical Engineering (UGA).

At the graduate level, we offer a Master of Arts in Teaching (MAT). Designed to provide a pathway to secondary school teaching certification in Georgia, the MAT is our first program developed for adult, non-residential students. There's a growing demand for teachers, and we want to be a part of educating the next generation of educators.

Preparing our students for purposeful, successful lives is a fundamental part of our mission. Our goal requires commitment from all stakeholders, including our ICL friends. We invite you to get involved—follow YHC on our social media channels, attend an event on campus, encourage your friends to visit the College, or make a donation to support student scholarships. YHC has so much to offer students, our community and our region, and we want ICL to help us spread the word!
